

MONDIP SEN

Engineering Manager & Solutions Architecture Leader | Cloud Infrastructure, SRE & Data Protection

New York, NY (Open to 100% Remote US) · 201-354-7564 · mondip.sen@gmail.com · linkedin.com/in/mondipsen · github.com/senmondip

SUMMARY

Engineering management and solutions architecture leader with **20+ years experience** delivering mission-critical cloud infrastructure, site reliability, enterprise data protection, and disaster recovery (DR) for Fortune 500 enterprises. **8+ years leading distributed engineering teams** (US, Europe, Asia) in 24/7/365 follow-the-sun environments. Proven track record leading multi-cloud platform transformations (AWS, Azure, GCP, OCI), building and scaling high-performing SRE and infrastructure engineering teams, establishing Agile/Scrum delivery cadences, and governing **15+ PB enterprise storage and backup estates** with 99.99% availability.

CORE TECHNICAL SKILLS

- **Engineering Leadership & Operational Governance:** Agile / Scrum sprint planning, backlog grooming, OKRs & KPIs; global team leadership (8+ years leading distributed engineering teams), 24/7/365 follow-the-sun on-call rotas; hiring, technical interviewing, onboarding, and mentoring senior/junior engineers; client escalation management, executive stakeholder alignment; vendor contract negotiation & procurement; runbook automation and post-incident root cause analysis (RCA)
- **Architecture & Infrastructure Strategy:** Enterprise multi-cloud architecture (AWS, Azure, GCP, OCI); container orchestration (Kubernetes, EKS, AKS, GKE, OpenShift); GitOps & declarative infrastructure (Terraform, Ansible, CI/CD); FinOps cloud cost optimization and infrastructure governance; Zero Trust security architecture, IAM, HashiCorp Vault
- **Observability, APM & SRE Governance:** Datadog, Splunk, IBM Instana, Prometheus, Grafana, Loki, Tempo, OpenTelemetry, Alertmanager; Service Level Objectives (SLOs) and SLAs, error budgets, proactive alerting, distributed tracing, runbook automation, and blameless post-mortem culture
- **Cloud Platforms & Containers:** AWS, Microsoft Azure, Google Cloud (GCP), Oracle Cloud Infrastructure (OCI); managed Kubernetes — **Amazon EKS, Azure AKS, Google GKE**, Red Hat OpenShift; Helm, Docker and Docker Compose, container registries; cloud HA and multi-region failover architecture
- **Infrastructure as Code & Automation:** Terraform, Ansible, Chef, Puppet; **GitOps** — Git as the source of truth for declarative infrastructure; **GitLab CI, Jenkins**, GitHub Actions; Python, Bash/KSH, PowerShell, SQL; Prefect orchestration; systemd service engineering
- **Security, Compliance & Risk Management:** Identity and access management (IAM), Active Directory, SSO/IdP, **HashiCorp Vault** (AppRole, envconsul); Zero Trust network access, TLS/PKI, audit logging; **HIPAA, PCI DSS, SEC 17a-4 / WORM retention, SOC 2, NIST, CIS Benchmark** hardening; BC/DR audit governance
- **Disaster Recovery & Enterprise Backup:** Enterprise BC/DR architecture, testing governance, and executive runbooks; **RTO/RPO** definition and SLA attainment; Veritas NetBackup 6.x–10.x (STS-certified), NetBackup Appliances (5230/5330), IBM Spectrum Protect (TSM), Dell EMC NetWorker, Avamar, Data Domain / **PowerProtect DD**, Veeam Enterprise, Commvault, **Rubrik, Cohesity**, NetApp AltaVault; EMC SRDF replication; multi-site failover
- **Storage & Virtualization:** Dell EMC VMAX / **PowerMax** / VNX / Unity, NetApp FAS / **ONTAP** / WAFL, Pure Storage, Hitachi, HP, **TrueNAS / OpenZFS**; Brocade and Cisco Nexus SAN fabrics; VMware vSphere / ESXi / vCenter / vMotion, Microsoft Hyper-V, **Proxmox VE, OpenStack**
- **Operating Systems & Databases:** Red Hat Enterprise Linux (RHEL), SUSE, Ubuntu, IBM AIX, HP-UX, Solaris, Windows Server 2008–2022; Oracle (RMAN), Microsoft SQL Server, Exchange, SharePoint, SAP, DB2, Sybase, Active Directory
- **Process & Tooling:** Agile / Scrum, Jira, Confluence, ITIL, ServiceNow, BMC Remedy, Zendesk; sprint planning and backlog grooming, vendor and project management, service operational procedures, technical documentation

PROFESSIONAL EXPERIENCE

Solutions Architect — Bell Integration

New York, NY (Remote) · Dec 2024 – Present

Lead Solutions Architect directing enterprise cloud infrastructure, storage modernization, data protection, and automation strategy for Fortune 500 and enterprise clients, including **Chemours, American Standard, and LIXIL**.

- **Direct multi-cloud infrastructure strategy and architectural governance** across AWS, Azure, and GCP, translating client business requirements into scalable, high-availability technical roadmaps.
- **Architect resilient container and platform infrastructure** on **Kubernetes** and **Docker**, establishing Zero Trust access controls, end-to-end TLS encryption, SSO integration, and centralized secrets governance with **HashiCorp Vault**.
- **Drive infrastructure as code (IaC) and GitOps standardization** using **Terraform** and **Ansible** via **GitLab CI** and **Jenkins** pipelines, enforcing immutable deployment standards and standardizing cloud configuration.
- **Spearhead enterprise data protection and storage architectures**, establishing high-availability storage topologies, automated disaster recovery workflows, and compliance-driven audit controls aligned with regulatory retention standards.
- **Establish full-stack observability and SRE standards** leveraging **Prometheus, Grafana, OpenTelemetry**, and centralized logging, instituting SLO/SLA monitoring, proactive alerting, and automated incident response runbooks.
- **Direct infrastructure modernization and FinOps programs**, optimizing compute/storage utilization across multi-cloud footprints while championing Python automation to eliminate operational toil.

Global Data Protection Team Lead / Sr. Data Protection Engineer — IPsoft (Amelia US LLC)

New York, NY · Mar 2016 – Nov 2024

Directed global enterprise backup and disaster recovery operations supporting Fortune 500 clients — **Estée Lauder, McKesson, Moody's, Celesio EU, Duracell, BP, and Sands Resorts** — across healthcare, financial services, energy, consumer goods, and public sectors.

- **Led the global data-protection engineering team** in an **Agile/Scrum** delivery model tracked in **Jira** and documented in **Confluence**, managing sprint planning, daily standups, backlog grooming, and team deliverables across US, Europe, and Asia time zones.
- **Managed engineering talent lifecycle and operational rotas**, conducting technical interviews, hiring, onboarding, mentoring, and upskilling senior and junior infrastructure engineers while maintaining 24/7/365 follow-the-sun coverage.
- **Served as primary escalation leader for critical enterprise incidents**, directing real-time incident command for P1 events, cross-team triage, root cause analysis (RCA), and executive stakeholder communications.
- **Architected, deployed, upgraded, and operated enterprise backup estates** — **Veritas NetBackup, Veeam Enterprise, IBM Spectrum Protect, Dell EMC NetWorker, Data Domain, EMC Unity, and NetApp AltaVault** — protecting mission-critical workloads across on-premises, **Azure, AWS, and GCP** environments.
- **Directed quarterly business-continuity and DR governance audits** for Fortune 500 accounts, validating historical-recovery SLAs/SLOs (RTO/RPO) and executing full DR failover testing on NetBackup with Dell EMC Data Domain.
- **Governed vendor relationships, SLA compliance, and capacity planning** across Dell EMC, NetApp, HP, IBM, and Veritas platforms, optimizing storage consumption and negotiating enterprise support agreements.
- **Owned service operational procedures (SOPs)**, technical documentation standards, and automated runbooks in Confluence, standardizing engineering practices and reducing MTTR across the global practice.

Sr. NetBackup Consultant — NYC Department of IT & Telecommunications (DoITT)

New York, NY · Sep 2015 – Feb 2016

- **Directed deployment of NetBackup 5230 appliances** across NYC primary data center and New Jersey DR site, managing team operational handover, patch governance, and platform lifecycle for municipal government workloads.
- **Governed platform reliability and compliance** across RHEL, SUSE, AIX, and Windows systems supporting critical city services, Oracle databases, SQL Server, Exchange, and SharePoint.
- **Validated municipal disaster recovery readiness** through structured failover drills and recoverability audits on NetBackup with EMC Data Domain.

Sr. NetBackup Engineer / Enterprise Technology Consultant — Arrosoft Solutions

New York, NY · Feb 2013 – Jan 2016

Data-protection deployment engineering and client consulting for **Children's National Medical Center, NYC DoITT, FISA, NJ State Department of Health, Boston EHS, and Yeshiva University / Albert Einstein College of Medicine**.

- **Delivered multi-site data protection architectures** protecting Oracle, SQL Server, Exchange, VMware, and RHEL/SUSE/AIX, directing master/media appliance deployments, Auto Image Replication, robotic tape libraries, and Storage Lifecycle Policies.
- **Led enterprise DR replication and high-availability implementations**, configuring EMC VMAX SRDF synchronization and Veritas Cluster Server (VCS) to guarantee zero-data-loss failover for Children's National Medical Center.
- **Automated enterprise infrastructure provisioning** as DevOps Automation Consultant using **Chef, Puppet, PowerShell, and KSH**, integrating cloud HA across AWS, Azure, and VMware environments.

Earlier Technical Roles

2009 – 2014

- **Hyper-V / Citrix VDI Support Engineer**, Diligex Cloud Services (clients: Viacom, US Space) — managed-service cloud VDI on Hyper-V and Citrix with AWS EC2/S3.
- **Network & Security Engineer**, GetFugu — scalable cloud-rendering infrastructure, intrusion detection, penetration testing.
- **Windows Network Support Analyst**, Star Alliance Capital (40 Wall Street) — trading-floor support for **200+ NYSE high-frequency equity and options traders** (Lightspeed/DAS).
- **Linux/UNIX System Administrator**, Intersessions Hosting — UNIX and Solaris hosting administration.

CERTIFICATIONS & TRAINING

- **Veritas / Symantec**: NetBackup for UNIX, STS Certified (2014) · Symantec Certified Specialist
- **Veeam Certified**: VMSP and VMTSP (2015) | **VMware**: VCP6 (vSphere)
- **NVIDIA Certified (2026)**: AI Factory Deployment Learning Path · Cumulus Linux Essentials · SONiC Essentials · Networking Technical Curriculum
- **Automation & Systems**: IPsoft IPCenter CSI Automation (DevOps) & ICA | Arrosoft Certified Engineer: Backup, Storage & Virtualization

EDUCATION

B.Tech, Computer Information Systems — CUNY, New York City College of Technology, New York, NY (2010)

OPEN SOURCE & PORTFOLIO

- **github.com/senmondip** — Author and maintainer of open-source enterprise infrastructure repositories covering automated backup recovery verification (NetBackup, Commvault, Veeam), multi-cloud Terraform modules, Kubernetes manifests, and Prometheus/Grafana observability dashboards.
- **Contributor — MH-VTL GUI** (virtual tape library): open-source contributor supporting virtual tape library emulation and tape-to-cloud migration testbeds.
