

# MONDIP SEN

## Enterprise Solutions Architect & Senior Infrastructure Engineer | Multi-Cloud, Kubernetes & Data Protection

New York, NY (Open to 100% Remote US) · 201-354-7564 · [mondip.sen@gmail.com](mailto:mondip.sen@gmail.com) · [linkedin.com/in/mondipsen](https://linkedin.com/in/mondipsen) · [github.com/senmondip](https://github.com/senmondip)

### SUMMARY

Enterprise Cloud, Storage & Data Protection Solutions Engineer with **20+ years experience** designing, migrating, and operating enterprise backup, storage, and disaster recovery (DR) environments for Fortune 500 clients across healthcare, financial services, energy, consumer goods, and government. STS-certified on Veritas NetBackup, with hands-on depth across the full data-protection ecosystem — **NetBackup, Commvault, Veeam, Rubrik, Cohesity, IBM Spectrum Protect (TSM), Dell EMC NetWorker, Avamar, and PowerProtect DD** — protecting Linux, UNIX, Windows, VMware, and **AWS / Azure / GCP / OCI** workloads. Former **global data-protection team lead**, now a **Solutions Architect** delivering cloud-native, automated, observability-driven infrastructure with **Kubernetes, Terraform, Ansible, and CI/CD**.

### CORE TECHNICAL SKILLS

- **Cloud Platforms & Containers:** AWS, Microsoft Azure, Google Cloud (GCP), Oracle Cloud Infrastructure (OCI); managed Kubernetes — **Amazon EKS, Azure AKS, Google GKE, Red Hat OpenShift, Helm, Docker**; AWS Backup, Azure Backup / Site Recovery; EC2/S3/EBS, MinIO; cloud HA and failover architecture
- **Infrastructure as Code & Automation:** **Terraform, Ansible**, Chef, Puppet; **GitOps** — Git as source of truth; **GitLab CI, Jenkins**, GitHub Actions; Python, Bash/KSH, PowerShell, SQL; Prefect workflow orchestration; systemd service engineering
- **Observability, SRE & Security:** **Datadog, Splunk, IBM Instana**, Prometheus, Grafana, Loki, Tempo, **OpenTelemetry**, Alertmanager; SLO and alert design; **HashiCorp Vault** (AppRole, envconsul); **Zero Trust** access, TLS/PKI; **HIPAA, PCI DSS, SEC 17a-4 / WORM retention, NIST & CIS Benchmarks**
- **Enterprise Backup & Recovery:** Veritas NetBackup 6.x–10.x (STS-certified), NetBackup Appliances (5230/5330), IBM Spectrum Protect (TSM), Dell EMC NetWorker, Avamar, Data Domain / **PowerProtect DD**, Veeam Backup & Replication, Commvault, **Rubrik, Cohesity**, NetApp AltaVault, Veritas Backup Exec
- **Storage, SAN/NAS & Virtualization:** Dell EMC VMAX / **PowerMax** / VNX / Unity, NetApp FAS / **ONTAP**, Pure Storage, Hitachi, HP, **TrueNAS**; Brocade & Cisco Nexus SAN fabrics; LUN provisioning, multipathing, NFS/CIFS/iSCSI, Fibre Channel, ZFS; VMware vSphere 7/8, ESXi, vCenter, Hyper-V, **Proxmox VE, OpenStack**
- **Operating Systems & Databases:** Red Hat Enterprise Linux (RHEL), SUSE, Ubuntu, IBM AIX, HP-UX, Solaris, Windows Server 2008–2022; Oracle (RMAN), Microsoft SQL Server, Exchange, SharePoint, SAP, DB2, Sybase, Active Directory
- **Process & Tooling:** **Agile / Scrum, Jira, Confluence**, ITIL, ServiceNow, BMC Remedy, Zendesk; vendor & project management, service operational procedures

### PROFESSIONAL EXPERIENCE

#### Solutions Architect — Bell Integration

New York, NY (Remote) · Dec 2024 – Present

Lead Solutions Architect directing enterprise cloud infrastructure, storage modernization, data protection, and automation strategy for Fortune 500 and enterprise clients, including **Chemours, American Standard, and LIXIL**.

- **Architect and operate resilient, enterprise cloud infrastructure** on **Kubernetes** and **Docker**, establishing zero-trust access controls, end-to-end TLS encryption, SSO integration, and centralized secrets management with **HashiCorp Vault**.
- **Deliver infrastructure as code (IaC) and multi-cloud automation** across **AWS, Azure, and GCP** using **Terraform** and **Ansible** via **GitLab CI** and **Jenkins** pipelines, enforcing immutable deployments and standardizing cloud configuration.
- **Architect enterprise data protection and storage solutions**, designing high-availability storage topologies, automated disaster recovery workflows, and compliance-driven audit controls aligned with regulatory retention standards.
- **Design comprehensive observability and SRE frameworks** utilizing **Prometheus, Grafana, OpenTelemetry**, and centralized logging to establish SLO/SLA-based monitoring, proactive alerting, and automated incident runbooks.
- **Drive infrastructure modernization and FinOps initiatives**, optimizing compute and storage utilization across multi-cloud environments while implementing scalable Python automation and workflow orchestration.

**Global Data Protection Team Lead / Sr. Data Protection Engineer — IPsoft (Amelia US LLC)** *New York, NY · Mar 2016 – Nov 2024*

Enterprise backup and DR for Fortune 500 clients — **Estée Lauder, McKesson, Moody's, Celesio EU, Duracell, BP, and Sands Resorts** — across healthcare, financial services, energy, consumer goods, US federal, and cloud-provider sectors.

- **Directed global data protection engineering and DR operations** for Fortune 500 accounts (Estée Lauder, McKesson, Moody's, BP, Sands Resorts), managing cross-functional delivery in Agile/Scrum, engineer onboarding, and executive SLA reporting.
- **Architected, modernized, and operated 15+ PB enterprise backup estates** across Veritas NetBackup (6.x–10.x), Veeam Enterprise, IBM Spectrum Protect, Dell EMC PowerProtect / Data Domain, and NetApp AltaVault, safeguarding 10,000+ critical SQL, Oracle RMAN, Exchange, and RHEL/Windows nodes.
- **Led enterprise business-continuity and DR failover audits**, consistently validating **RTOs under 45 minutes and RPOs under 15 minutes** through multi-site disaster simulation drills on NetBackup and Dell EMC Data Domain.
- **Resolved critical L3 storage and backup escalations** spanning NDMP, Oracle RMAN, Exchange, Sybase, and SQL Server; performance-tuned storage lifecycle policies and global deduplication to achieve **28% reduction in storage overhead**.
- **Administered multi-vendor SAN/NAS storage arrays** (Dell EMC PowerMax/Unity, NetApp ONTAP, Pure Storage, HP, Hitachi), orchestrating LUN provisioning, multipathing, and non-disruptive capacity expansions.

**Sr. NetBackup Consultant — NYC Department of IT & Telecommunications (DoITT)** *New York, NY · Sep 2015 – Feb 2016*

- **Spearheaded municipal disaster recovery deployment for NYC Government (DoITT)**, engineering clustered Veritas NetBackup 5230 appliances across NYC primary data centers and NJ DR sites protecting mission-critical municipal databases.
- **Automated backup validation and health-check workflows**, cutting daily backup failure rates from 14% to **under 0.5%** and ensuring 100% municipal audit compliance.

**Sr. NetBackup Engineer / Enterprise Technology Consultant — Arrosoft Solutions** *New York, NY · Feb 2013 – Jan 2016*

Data-protection deployment engineering for **Children's National Medical Center, NYC DoITT, FISA, NJ State Department of Health, Boston EHS, and Yeshiva University / Albert Einstein College of Medicine**.

- **Engineered multi-site enterprise storage and data protection environments** for Children's National Medical Center, NYC DoITT, FISA, NJ State DOH, and Yeshiva University, deploying NetBackup Master/Media PDDO/MSDP 5230 appliances, Auto Image Replication (AIR), and SAN storage networks.
- **Implemented EMC VMAX SRDF active-passive replication** with Veritas Cluster Server (VCS), validating seamless application and storage failover across primary and DR data centers for Children's National Medical Center.
- **Automated hyperscale server provisioning as DevOps Automation Engineer** using Chef, Puppet, PowerShell, and KSH; built cloud HA failover across AWS EC2/S3, Azure, and VMware with centralized syslog and network IDS.

## Hyper-V / Citrix VDI Client Support Engineer — Diligex Cloud Services

New York, NY · Feb 2014 – Oct 2014

Cloud hosted desktop virtualization and managed infrastructure for corporate accounts including **Viacom, US Space, and Sucherman Consulting**.

- **Supported enterprise cloud-hosted desktop virtualization** (Citrix XenDesktop/XenApp, Microsoft Hyper-V) across Windows Server 2008 R2/2012 environments integrated with AWS EC2 and S3 hybrid storage.
- **Monitored multi-tenant client infrastructure and network health**, proactively resolving high-priority alerts to maintain uptime for enterprise media and aerospace clients.
- **Handled Tier 2/3 escalations** for Citrix policy management, virtual desktop provisioning, user profiles, and hosted Exchange connectivity via phone, ticketing, and remote tools.

## Network & Security Engineer / Cloud Support Lead — GetFugu

New York, NY · Aug 2010 – Nov 2013

Cloud rendering infrastructure and network security in partnership with **PowerMediaGroup** and **Georgia Tech**.

- **Engineered and managed network security monitoring and cloud-hosted rendering infrastructure** across UNIX, Solaris (8/9/10), and Linux server farms.
- **Conducted regular vulnerability assessments and penetration testing**, hardening network boundaries with intrusion detection systems (IDS), Untangle, and IPsec VPN tunnels.
- **Administered DNS/BIND, network routing, and server provisioning** across Rackspace and AWS cloud infrastructure to support scalable image rendering workloads.

## Windows Network Support Analyst — Star Alliance Capital Partners

40 Wall Street, New York, NY · Nov 2009 – Jul 2010

Trading-floor infrastructure support for proprietary equity and options trading desks (**Dimension Trading Group, CBSX**).

- **Delivered mission-critical trading-floor systems support for 200+ NYSE high-frequency proprietary equity and options traders** in an active, zero-downtime environment.
- **Maintained and supported low-latency electronic trading platforms (Lightspeed, DAS Trader)**, diagnosing real-time order-routing bottlenecks, network feeds, and multi-monitor trader workstations.
- **Executed daily market-open readiness verifications**, emergency hardware failovers, and rapid incident response under high-pressure market conditions.

## Linux/UNIX System & Network Administrator — Intersessions Hosting

Jersey City, NJ · Aug 2006 – Oct 2009

24/7 datacenter hosting operations and colocation infrastructure support.

- **Monitored and maintained Linux and UNIX hosting environments** (Red Hat, CentOS, SUSE, Debian, FreeBSD, and Solaris) in a high-density datacenter facility.
- **Assembled, racked, and provisioned physical servers**, configuring KVM virtualization, network interfaces, storage, and automated OS deployment.
- **Provided 24/7 on-call incident triage and remote-hands datacenter support**, maintaining Nagios monitoring and resolving server and network outages.

## CERTIFICATIONS & TRAINING

- **Veritas / Symantec:** NetBackup for UNIX, STS Certified (2014) · Symantec Certified Specialist
- **Veeam Certified:** VMSP and VMTSP (2015) | **VMware:** VCP6 (vSphere)
- **NVIDIA Certified (2026):** AI Factory Deployment Learning Path · Cumulus Linux Essentials · SONiC Essentials · Networking Technical Curriculum
- **Automation & Systems:** IPsoft IPCenter CSI Automation (DevOps) & ICA | Arrosoft Certified Engineer: Backup, Storage & Virtualization

## EDUCATION

**B.Tech, Computer Information Systems** — CUNY, New York City College of Technology, New York, NY (2010)

## OPEN SOURCE & PORTFOLIO

- **github.com/senmondip** — publishing an open-source portfolio of enterprise data-protection and infrastructure automation: **38 repositories covering NetBackup, Commvault, IBM Spectrum Protect, Veeam, VMware vSphere, Linux/Windows Server, AWS, storage operations, disaster recovery, and Prometheus/Grafana observability**, released on a scheduled cadence through 2026.
- **Contributor — MH-VTL GUI** (virtual tape library): re-engineered the codebase for release builds.
