

Mondip Sen

Enterprise Solutions Architect & Senior Infrastructure Engineer | Multi-Cloud, Kubernetes & Data Protection

White Plains, NY 10601 · mondip.sen@gmail.com · 201-354-7564 · linkedin.com/in/mondipsen · github.com/senmondip

Open to onsite, hybrid, or remote roles across the New York–New Jersey–Connecticut tri-state area

SUMMARY

Enterprise Solutions Architect and Senior Infrastructure Engineer with **20+ years of experience** designing, **migrating**, and operating mission-critical backup, storage, and disaster recovery (DR) environments for Fortune 500 clients across healthcare, financial services, energy, consumer goods, and government. STS-certified on Veritas NetBackup, with hands-on depth across the full data-protection ecosystem — **NetBackup, Commvault, Veeam, Rubrik, Cohesity, IBM Spectrum Protect (TSM), Dell EMC NetWorker, Avamar, and PowerProtect DD** — protecting Linux, UNIX, Windows, VMware, and **AWS / Azure / GCP / OCI** workloads. Former **global data-protection team lead**, currently delivering cloud-native, automated, observability-driven infrastructure with **Kubernetes, Terraform, Ansible, and CI/CD**. Proven track record translating complex business-continuity and disaster recovery requirements into high-availability multi-cloud architectures, resilient operational standards, and automated deployment pipelines.

CORE TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Microsoft Azure, Google Cloud (GCP), Oracle Cloud Infrastructure (OCI); managed Kubernetes — **Amazon EKS, Azure AKS, Google GKE**; AWS Backup, Azure Backup and Site Recovery; EC2/S3/EBS, object storage, S3-compatible storage (MinIO); cloud HA and failover architecture
- **Containers & Orchestration:** **Kubernetes** (deployments, services, ingress, operators) on **EKS / AKS / GKE** and **Red Hat OpenShift, Helm, Docker** and Docker Compose, container registries
- **Infrastructure as Code & Automation:** **Terraform, Ansible, Chef, Puppet, GitOps** — Git as the source of truth for declarative infrastructure; **GitLab CI, Jenkins**, GitHub Actions; Python, Bash/KSH, PowerShell, SQL; Prefect orchestration; systemd service engineering
- **Observability, APM & SRE:** **Datadog, Splunk, IBM Instana**, Prometheus, Grafana, Loki, Tempo, **OpenTelemetry**, Alertmanager; application performance monitoring (APM), SLO and alert design, distributed tracing, centralized logging, runbook automation
- **Security, Identity & Compliance:** **Identity and access management (IAM)** — Active Directory, SSO/IdP, **HashiCorp Vault** (AppRole, envconsul); **Zero Trust** network access, TLS/PKI, network IDS, tamper-evident audit logging; **HIPAA, PCI DSS, SEC 17a-4 / WORM retention, NIST and CIS Benchmark** hardening; business-continuity and DR audit
- **AI & Accelerated Infrastructure:** **NVIDIA AI infrastructure** (AI Factory deployment, GPU compute, Cumulus Linux / SONiC datacenter networking); cloud FinOps and cost optimization, high-throughput storage pipelines, and Python automation
- **Enterprise Backup & Recovery:** Veritas NetBackup 6.x–10.x (STS-certified), NetBackup Appliances (5230/5330), IBM Spectrum Protect (TSM), Dell EMC NetWorker, Avamar, Data Domain / **PowerProtect DD**, Veeam Backup & Replication, Commvault, **Rubrik, Cohesity**, NetApp AltaVault, Veritas Backup Exec
- **Backup Engineering & Migration:** Platform **migration** and upgrade (NetBackup 6.x→10.x, physical to cloud, tape to disk-to-cloud); Storage Lifecycle Policies, Auto Image Replication (AIR), PDDO/MSDP deduplication, multiplexing/streaming, NDMP, Granular Recovery (GRT), OpsCenter/NOM/VOM, EMC Data Protection Advisor, capacity planning, performance tuning
- **Disaster Recovery & Business Continuity:** DR architecture, testing and runbooks; **RTO/RPO** definition; EMC SRDF replication; multi-site failover; BC/DR audit; ransomware recovery, immutable copies and air-gapped retention
- **Virtualization & Private Cloud:** VMware vSphere / ESXi / vCenter / vMotion, Microsoft Hyper-V, KVM, **Proxmox VE, OpenStack**
- **Storage & SAN/NAS:** Dell EMC VMAX / **PowerMax** / VNX / Unity, NetApp FAS / **ONTAP** / WAFL, Pure Storage, Hitachi, HP, **TrueNAS / OpenZFS**; Brocade and Cisco Nexus SAN fabrics; LUN provisioning, multipathing, NFS/CIFS/iSCSI, Fibre Channel, ZFS; tape libraries and VTL (Oracle StorageTek SL3000/SL500, MHVTL), ExaGrid

- **Operating Systems:** Red Hat Enterprise Linux (RHEL), SUSE, Ubuntu, IBM AIX, HP-UX, Solaris, Windows Server 2008–2022
- **Applications & Databases Protected:** Oracle (RMAN), Microsoft SQL Server, Exchange, SharePoint, SAP, DB2, Sybase, Active Directory
- **Process & Tooling:** Agile / Scrum, Jira, Confluence, ITIL, ServiceNow, BMC Remedy, Zendesk; sprint planning and backlog grooming, vendor and project management, service operational procedures, technical documentation

PROFESSIONAL EXPERIENCE

Solutions Architect — Bell Integration

New York, NY (Remote) · Dec 2024 – Present

Lead Solutions Architect directing enterprise cloud infrastructure, storage modernization, data protection, and automation architecture for Fortune 500 and enterprise clients, including **Chemours, American Standard, and LIXIL**.

- **Architect and operate resilient, enterprise cloud infrastructure** on **Kubernetes** and **Docker**, establishing zero-trust access controls, end-to-end TLS encryption, SSO integration, and centralized secrets management with **HashiCorp Vault**.
- **Deliver infrastructure as code (IaC) and multi-cloud automation** across **AWS, Azure, and GCP** using **Terraform** and **Ansible** via **GitLab CI** and **Jenkins** pipelines, enforcing immutable deployments and standardizing cloud configuration.
- **Architect enterprise data protection and storage solutions**, designing high-availability storage topologies, automated disaster recovery workflows, and compliance-driven audit controls aligned with regulatory retention standards.
- **Design comprehensive observability and SRE frameworks** utilizing **Prometheus, Grafana, OpenTelemetry**, and centralized logging to establish SLO/SLA-based monitoring, proactive alerting, and automated incident runbooks.
- **Drive infrastructure modernization and FinOps initiatives**, optimizing compute and storage utilization across multi-cloud environments while implementing scalable Python automation and workflow orchestration.

Global Data Protection Team Lead / Sr. Data Protection Engineer — IPsoft (Amelia US LLC)

New York, NY · Mar 2016 – Nov 2024

Enterprise backup and DR for Fortune 500 clients — **Estée Lauder, McKesson, Moody's, Celesio EU, Duracell, BP, and Sands Resorts** — across healthcare, financial services, energy, consumer goods, US federal, and cloud-provider sectors.

- **Led the global data-protection team** in an **Agile/Scrum** delivery model tracked in **Jira** and documented in **Confluence**, owning service operational procedures, engineer onboarding and training, vendor and project management, client escalations, and daily service metrics.
- **Architected, deployed, upgraded, and operated enterprise backup platforms** — **Veritas NetBackup, Veeam Enterprise, IBM Spectrum Protect, Dell EMC NetWorker, Data Domain, EMC Unity, and NetApp AltaVault** — protecting RHEL, SUSE, AIX, and Windows systems running Exchange, SharePoint, SQL Server, and Oracle across on-premises, **Azure, AWS, and GCP** environments.
- **Ran quarterly business-continuity and DR audits** for enterprise clients, including historical-recovery validation and full DR failover testing on NetBackup with Dell EMC Data Domain.
- **Resolved complex backup failures** spanning NDMP, Exchange, Oracle, Sybase, SQL Server, SharePoint, and DB2; performance-tuned policies, storage lifecycle, and deduplication to vendor best practice.
- **Administered multi-vendor storage estates** (Dell EMC, NetApp, HP, IBM, Hitachi): LUN provisioning and decommission, multipath support, and capacity planning.

Sr. NetBackup Consultant — NYC Department of IT & Telecommunications (DoITT)

New York, NY · Sep 2015 – Feb 2016

- **Deployed NetBackup 5230 appliances** across the NYC primary data center and New Jersey DR site, then managed, upgraded, and patched **Veritas NetBackup** for RHEL, SUSE, AIX, and Windows protecting Exchange, SharePoint, SQL Server, and Oracle.

- **Validated recoverability** through scheduled DR testing on NetBackup with EMC Data Domain for a municipal government environment.

Sr. NetBackup Engineer / Enterprise Technology Consultant — Arrosoft Solutions

New York, NY · Feb 2013 – Jan 2016

Data-protection deployment engineering for **Children's National Medical Center, NYC DoITT, FISA, NJ State Department of Health, Boston EHS, and Yeshiva University / Albert Einstein College of Medicine.**

- **Built multi-site, large-scale data-protection environments** protecting Oracle, SQL Server, Exchange, VMware, and RHEL/SUSE/AIX: Master/Media PDDO 5230 appliances, **Auto Image Replication**, robotic tape libraries, Storage Lifecycle Policies, SAN storage networks, IPMI, RMAN/SQL/KSH scripting, OpsCenter alerting, and AD/LDAP integration.
- **Implemented EMC VMAX SRDF replication** with active-passive synchronization and Storage Foundation HA / Veritas Cluster Server, validating application and storage failover across primary and DR sites for Children's National Medical Center.
- **Automated hyperscale server deployment** as DevOps Automation Engineer using **Chef, Puppet, PowerShell, and KSH**; built cloud HA failover across AWS EC2/S3, Azure, VMware, and Hyper-V, with centralized syslog, network IDS, and ITIL ticketing.

Earlier Roles — 2009 – 2014

- **Hyper-V / Citrix VDI Support Engineer**, Diligex Cloud Services (clients: Viacom, US Space) — managed-service cloud VDI on Hyper-V and Citrix with AWS EC2/S3.
- **Network & Security Engineer**, GetFugu — scalable cloud-rendering infrastructure, intrusion detection, penetration testing.
- **Windows Network Support Analyst**, Star Alliance Capital (40 Wall Street) — trading-floor support for **200+ NYSE high-frequency equity and options traders** (Lightspeed/DAS).
- **Linux/UNIX System Administrator**, Intersessions Hosting — UNIX and Solaris hosting administration.

CERTIFICATIONS & TRAINING

- **Veritas / Symantec — NetBackup for UNIX, STS Certified (2014)** · Symantec Certified Specialist
- **Veeam — VMSP and VMTSP (2015)**
- **VMware VCP6** (vSphere)
- **NVIDIA — AI Factory Deployment Learning Path (2026)** · AI infrastructure design and deployment
- **NVIDIA — Cumulus Linux Essentials (2026)** and **SONiC Essentials (2026)** · datacenter network operating systems
- **NVIDIA — Networking Technical Curriculum (2026)**
- IPsoft IPCenter CSI Automation (DevOps) and IPCenter Certified Associate (ICA)
- Arrosoft — Certified Engineer: Enterprise Backup, Storage, Data Protection and Virtualization

EDUCATION

B.Tech, Computer Information Systems — CUNY, New York City College of Technology, New York, NY (2010)

OPEN SOURCE & PORTFOLIO

- **github.com/senmondip** — Author and maintainer of open-source enterprise infrastructure repositories covering automated backup recovery verification (NetBackup, Commvault, Veeam), multi-cloud Terraform modules, Kubernetes manifests, and Prometheus/Grafana observability dashboards.
- Contributor — **MH-VTL (Virtual Tape Library) GUI**: open-source contributor supporting virtual tape library emulation and tape-to-cloud migration testbeds.
